Attach binaries by dropping them here or selecting them.
This is a pre-release
We'll point out that this release is identified as non-production ready.
Publish release
Save draft
Tagging suggestions
It's common practice to prefix your version names with the letter v. Some good tag names might be v1.0 or v2.3.4.
If the tag isn't meant for production use, add a pre-release version after the version name. Some good pre-release versions might be v0.2-alpha or v5.9-beta.3.
Semantic versioning
If you're new to releasing software, we highly recommend reading about semantic versioning.

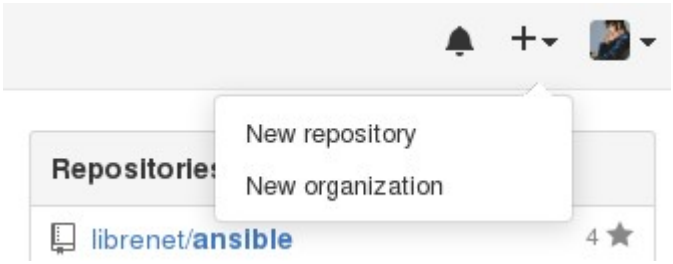
Chapter 3: Managing Organizations and Teams



Create an organization

Completed
Set up a personal account

Step 2:
Set up the organization

Step 3:
Invite team members

Set up the organization

Organization name

ghessentials

The organization will live at https://github.com/**ghessentials**

Billing email

axil[redacted]e

Receipts will be sent here

Choose the organization's plan

SECURE

Plan	Cost (view in EUR)	Private repos	
Diamond	$450/month	300	Choose
Platinum	$200/month	125	Choose
Gold	$100/month	50	Choose
Silver	$50/month	20	Choose
Bronze	$25/month	10	Choose
Open Source	$0/month	0	Choose

Create organization

Organizations

- Repository management
- Fine-grained permissions
- Focused dashboard

The credit card and plan you choose on this screen will be billed to the organization — not your user account (**axilleas**).

Managed by owners

On the next screen you'll be able to grant administrative access to other GitHub users. These people will be able to manage every aspect of the organization (billing, repositories, teams, etc).

Learn more

Invite team members

✓ **Completed** Set up a personal account	✓ **Completed** Set up the organization	**Step 3:** Invite team members

Invite people to the github-essentials Owners Team

Search by username, full name or email address

axilleas
Achilleas Pipinellis

Finish

Owners

- ✓ Create repositories
- ✓ Organize into teams
- ✓ Review code
- ✓ Communicate via @mentions

Owners have full access to **all of the organization's repositories** and have **admin rights** to the organization.

Owners can change billing info and cancel organization plans.

Learn more

Owners will receive their invitation via email. They can also visit https://github.com/github-essentials to accept the invitation right away.

ghessentials

Repositories | People 1 | Teams 0 | Settings

This organization has no repositories. Create one now.

- Webhooks

Repository creation

Allowing your organization's members to create repositories lets them share and work on projects more openly. If enabled, members will be able to create **public** and **private** repositories

☑ **Allow members to create repositories for this organization**

Save

ⓘ Outside collaborators can **never** create repositories.

Default repository permission

Choose the default permission level for organization members.

○ **Admin**
Members will be able to clone, pull, push, and add new collaborators to all repositories.

○ **Write**
Members will be able to clone, pull, and push all repositories.

◉ **Read**
Members will be able to clone and pull all repositories.

○ **None**
Members will only be able to clone and pull public repositories. To give a member additional access, you'll need to add them to teams or make them collaborators on individual repositories.

Save

ⓘ The default repository permission **only applies to organization members**, not to outside collaborators.

Owner **Repository name**

ghessentials / crispy-wookie

Great repository names are short and memorable. Need inspiration? How about **crispy-wookie**.

Description (optional)

Public
Anyone can see this repository. You choose who can commit.

Private
You choose who can see and commit to this repository.

Initialize this repository with a README
This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add .gitignore: **None** | Add a license: **None**

Create repository

Give access to the people you work with

You should give access to the collaborators and teams you need to work with.

Add teams and collaborators

Repositories | People 1 | **Teams 0** | Settings

Seamless communication with teams

Teams are a great way for groups of people to communicate and work on code together.
Take a look at why they're great.

Flexible repository access

You can add repositorites to your teams with more flexible levels of access (Admin, Write, Read).

Request to join teams

Members can quickly request to join any team. An owner or team maintainer can approve the request.

Team mentions

Use team @mentions (ex. **@github/design** for the entire team) in any comment, issue, or pull request.

Create a new team | Learn more

ghessentials / **crispy-wookie**

Unwatch 1

- Options
- **Collaborators & teams**
- Webhooks & services
- Deploy keys

Teams + Create new team

No teams have been given access to this repository yet.

Create new team

Team name

Documentation ✓

Mention this team in conversations as **@ghessentials/documentation**.

Description (optional)

Doc team

Team visibility

- **Visible** Recommended
  A visible team can be seen and @mentioned by every member of this organization.
- **Secret**
  A secret team can only be seen by its members.

Edit axil42's invitation to ghessentials

Originally invited by Achilleas Pipinellis. As an owner, you can give axil42 a different role and pick different teams for them.

Member
Members can see all other members, and can be granted access to repositories. They can also create new teams and repositories.

Owner
Owners have full administrative rights to the organization and have complete access to all repositories and teams.

Optionally, you can pick some teams for axil42 too.

Transform account

You cannot transform this account into an organization until you leave all organizations that you belong to.

Turn axil44 into an organization

Organizations New organization

You are not a member of any organizations.

Transform account

Turn axil44 into an organization

Account transformation warning

What you are about to do is an irreversible and destructive process.
Please be aware:

- You will no longer be able to sign into axil44 (all administrative privileges will be bestowed upon the owners you choose)
- Any user-specific information (OAuth tokens, SSH keys, Job Profile, etc) will be erased
- Any commits credited to axil44 will no longer be linked to this GitHub account

If you are using axil44 as a personal account, you should create a new personal account before transforming axil44 into an organization.

Turn axil44 into an organization

Transform your user into an organization

Step 1: Set up the organization

Step 2: Wait for your transformation

Step 3: Sign in to personal account

Set up the organization

Organization name

axil44

The organization will live at https://github.com/**axil44**

Billing email

a[redacted]om

Receipts will be sent here

Choose an organization owner

Achilleas Pipinellis
axilleas

Choose either your secondary personal account or another user you trust to manage your new organization.

Create organization

Organizations

- ✓ Repository management
- ✓ Fine-grained permissions
- ✓ Focused dashboard

If you choose to upgrade to a paid plan after the transformation the credit card and plan you choose will be billed to the organization — not your user account.

Managed by owners

On this screen you'll be able to grant administrative access to other GitHub users. These people will be able to manage every aspect of the organization (billing, repositories, teams, etc).

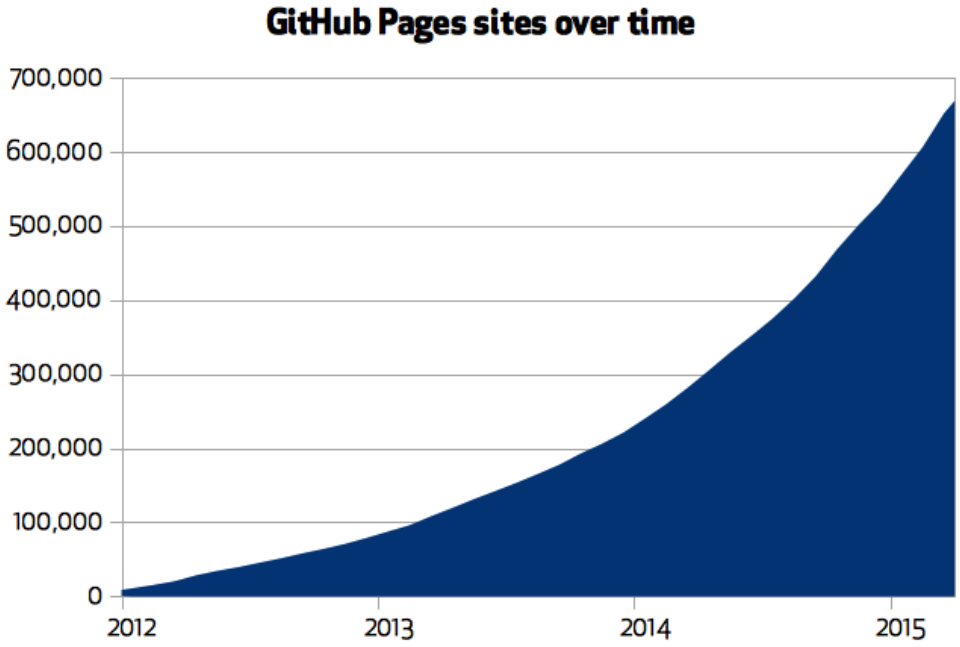
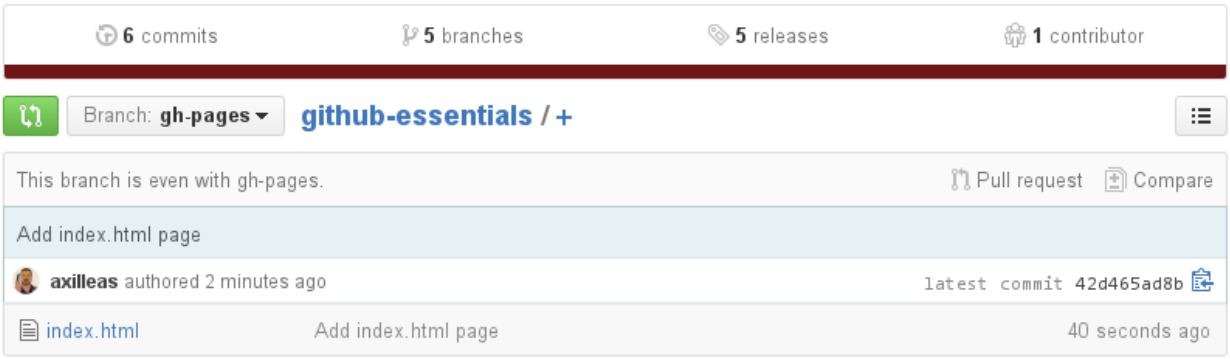
Chapter 5: GitHub Pages and Web Analytics



Github for dummies http://githubessentials.com — Edit



GitHub Pages

Automatic page generator

Create a beautiful site for your project with our automatic GitHub Pages generator. Author your content in our Markdown editor, select a theme, then publish.

Launch automatic page generator

Custom and Jekyll-based sites

To publish a page manually, push an HTML or Jekyll site to a branch named `gh-pages`. Read the Pages help article for more information.

GitHub Pages

✔ Your site is published at http://axilleas.github.io/github-essentials.

Update your site

To update your site, push your HTML or Jekyll updates to your `gh-pages` branch. Read the Pages help article for more information.

Overwrite site

Replace your existing site by using our automatic page generator. Author your content in our Markdown editor, select a theme, then publish.

Launch automatic page generator

New project site

Create a new GitHub Pages site for your project.

Markdown supported

```
### Welcome to GitHub Pages.
This automatic page generator is the easiest way to create beautiful pages for all of your projects. Author your page content
here [using GitHub Flavored Markdown](https://guides.github.com/features/mastering-markdown/), select a template crafted by a
designer, and publish. After your page is generated, you can check out the new `gh-pages` branch locally. If you're using
GitHub for Mac or GitHub for Windows, simply sync your repository and you'll see the new branch.

### Designer Templates
We've crafted some handsome templates for you to use. Go ahead and click 'Continue to layouts' to browse through them. You
can easily go back to edit your page before publishing. After publishing your page, you can revisit the page generator and
```

Google Analytics

Add Google Analytics to your Pages site by adding a tracking ID number (it looks something like `UA-000000-01`). Need help finding your tracking ID?

Features

- [x] **Wikis**
  GitHub Wikis is a simple way to let others contribute content. Any GitHub user can create and edit pages to use for documentation, examples, support, or anything you wish.

- [ ] **Restrict editing to collaborators only**
  Public wikis will still be readable by everyone.

Features

- [x] **Wikis**
  GitHub Wikis is a simple way to let others contribute content. Any GitHub user can create and edit pages to use for documentation, examples, support, or anything you wish.

- [ ] **Restrict editing to collaborators only**
  Public wikis will still be readable by everyone.

- [x] **Issues**
  GitHub Issues adds lightweight issue tracking tightly integrated with your repository. Add issues to milestones, label issues, and close & reference issues from commit messages.
